This is colonization.
This is not.

זו קולוניזציה. וזו לא.

Colonialism, in the textbook sense, is rule by a foreign power from a home country far away, the "metropole". Here are the cases from the reel side by side.

קולוניאליזם, בהגדרה, הוא שלטון של מעצמה זרה מארץ אם רחוקה. הנה המקרים מהסרטון, זה לצד זה.

Case	Ruled from	What spread
Britain in India (British raj, to 1947)	Britain	English; wealth shipped home
Spain in the Americas (Tordesillas, 1494)	Spain	Spanish, the Catholic Church, silver and gold sent to Spain
France in Algeria, 1830 to 1962	France	French, settlers from France
Early Arab conquests, from the 7th century	Arabia, then the caliphate	Arabic, which over centuries replaced Coptic and Aramaic
The Jews in the Land of Israel	No mother country	Hebrew, which was born here

Why the last row is different

למה השורה האחרונה שונה

- Hebrew was written in this land from the 10th century BCE.
- Jerusalem and Hebron, Judaism's holiest places, are here; Jewish prayer faces Jerusalem.
- Jews never fully left: the Old Yishuv kept a Jewish presence in Jerusalem, Hebron, Safed and Tiberias.
- The 1939 White Paper capped Jewish immigration, and in 1947 Britain sent the Exodus passengers back to Europe.

In my view: there is no mother country and no empire shipping riches home. That is not colonization. That is coming home. You can disagree; tell me why in the DM.
