The numbers: Israel and its neighbours

Nominal GDP, current US$, 2024. Thanks for commenting COLONY.

1. Total economy (nominal GDP) and population

Country	GDP 2024 (US$)	Population 2024	GDP per person (US$)
Israel	**$542.25B**	**10.0M**	**$54,291**
Egypt	$383.11B	116.5M	$3,594
Jordan	$58.70B	11.6M	$5,003
Lebanon	$30.47B	5.8M	$5,248
Syria	$19.99B (2023)	24.7M	$847 (2023)
Four neighbours combined	**$492.27B**	**158.6M**	**$3,104**

Israel's economy is bigger than all four neighbours combined, by about $50B (+10%).
Combined GDP per person for the neighbours = $492.27B / 158.57M people = $3,104.

2. Per person: Israel vs everyone around us

	GDP per person (US$)	Multiple
Israel	**$54,291**	
Neighbours, World Bank populations (158.6M)	$3,104	17.5x
Neighbours, IMF populations (147.7M)	$3,333	16.3x

Per person, Israelis produce over 15 times more than the 158 million people around us.

"Over 15" holds under both population bases (17.5x and 16.3x). Per capita figures cannot be added: summing the four neighbours' per capita figures ($14,692) and comparing would give 3.7x, which is not a meaningful comparison.

Satire about an accusation, not about our neighbours. Figures rounded; nominal (not PPP) US dollars.
